<b>Information Source:</b>	AAIU Report Form submitted by the Pilot. AAIU Field Investigation

## **SYNOPSIS**

OK-MUA 78, a SAMBA microlight, struck the airfield boundary wire fence following an attempted go-around. Both Pilot and Passenger exited the aircraft safely.

# FINAL REPORT

## 1. FACTUAL INFORMATION

### 1.1 History of the Flight

The accident aircraft was one of two SAMBA microlights, which routed from Abbeyshrule Airfield in loose formation to Clonbullogue Airfield. On landing Runway (RWY) 09, where the wind was SSW 230/06 kts, the aircraft bounced slightly and veered to the left. The Pilot applied full power for a go-around but lost directional control; the aircraft struck and stopped at the airfield boundary wire fence. Here, the aircraft swung on this impact through almost 180 degrees (**Photo No. 1**). The Pilot switched off all electrics and fuel and both he and his passenger vacated the aircraft safely. There was no fire.

### 1.2 Damage

There was serious impact damage to the aircraft, including the front nose wheel, propeller, righthand main gear, wing and lefthand wing.

**Photo No. 1: Impacted airfield boundary wire fence and broken posts.**
