

Safety Recommendation Number :	5 of 2003
AAIU Event Reference :	2002-0005
Date of Publication of Safety Recommendation :	11/04/2003

Safety Recommendation:

The International Civil Aviation Organisation should consider providing provisions in Annex 14 and related guidance material for gaining access to a disabled aircraft where, for any reason, the emergency slides are not deployed.

Response:

In a letter to the AAIU dated 30 June 2003 stated: “ICAO utilizes a number of study groups to provide specialist advice to the Secretariat on a range of technical issues. The Rescue and Fire Fighting Study Group (RFFSG) is due to meet in Montreal in July of this year. As the three recommendations” (Safety Recommendations SR 5, SR 11 and SR 12) “ fall within the area of expertise of the RFFSG, the recommendations have been added to the work of the study group. The result of this work will assist ICAO in determining its future action on the subject.”
