

Safety Recommendation Number:	IRLD2015001
AAIU Event Reference:	IRL00913090
AAIU Report Number:	2015-001
Date of Publication of Safety Recommendation:	21/01/2015
Safety Recommendation Status:	Implemented, closed

Safety Recommendation:

The UK Civil Aviation Authority (CAA) should review with the Maintenance/Repair Organisation (MRO), the overhaul and certification of components for which the MRO does not have approval.

Response:

The UK CAA advised the AAIU by letter dated 6 March 2015 as follows:

"CAA Response

The CAA has already undertaken an initial review of the landing gear overhaul “work pack”, generated by the associated MRO. As a result, four (Level 2) findings have been raised, associated with certifying staff; certification of maintenance; maintenance records and the quality system, which the organisation is required to formally respond to by 22 April 2015.

Additionally, the CAA is undertaking on-site audit activity with the MRO in February (2015), as part of our routine oversight programme. This audit will include a review of the issues raised in the AAIU report. If any further issues / non-compliances are identified during this activity, audit findings will be raised and managed in the normal manner."

AAIU Comment:

08/07/2015 - The AAIU considers the status of this recommendation as "Implemented, Closed"
