

<b>Safety Recommendation Number:</b>	IRLD2013017
<b>AAIU Event Reference:</b>	IRL00911067
<b>AAIU Report Number:</b>	2013-008
<b>Date of Publication of Safety Recommendation:</b>	15/05/2013
<b>Safety Recommendation Status:</b>	Implemented, closed

**Safety Recommendation:**

Avions de Transport Regional (ATR) should provide improved guidance regarding landing techniques for the different models of ATR 72 during turbulent crosswind conditions.

**Response:**

The Safety Manager of Avions De Transport Regional (ATR) Aircraft advised the AAIU by Email dated 07April 2014 that:

“In response to this safety recommendation, ATR has developed a Safety Note entitled “Be prepared for crosswind landing”. This safety note has been widely distributed among ATR operators. Our intent is to build a safety library providing guidance on various subject in a similar way as done through this first safety note.”

A copy of the ATR Safety Note may be viewed at the following URL
